The Rental Affordability Index is the ratio of 2-Bedroom Rent Affordable at Median Renter Income to Median 2-Bedroom Rent. An index of less than 1 means the area is generally unaffordable – i.e., a renter household earning area median renter income could not cover the cost of the median 2-bedroom apartment (including utilities) using no more than 30% of gross income. Note that prior to 2020, average rents were used rather than median rents.
